Subjective Answer Evaluation

Refeena T P

MCA, Semester VI
Department of Computer Application
Government Engineering College, Thrissur

Guided By,
Asst.Prof. JIBIN THOMAS

Problem Statement

▶ Valuating the Subjective Answers is a critical task to perform

▶ Evaluation may vary along with the emotions of Person

▶ Teadious task

▶ Time consuming

▶ Automating repetitive tasks-goal of the industrial and technological revolution

Proposed Solution

▶ To develop a system that evaluates subjective answers

▶ Help evaluators to do the teadious task

▶ Reducing the time for evaluation process

▶ The proposed system is coded in Python. To activate the API, you will need the following.

    ▶ Google account
    ▶ A Google Cloud Platform project with an active GCP billing account.

MODULES

- ▶ Text extraction
- ▶ Answer evaluation
- ▶ Diagram detection and evaluation

PROGRESS

▶ Text Extraction Completed

Project Plan

THANK YOU
